Wintertime Ozone Production Issue in the Uinta Basin+GF edits (003) CD review.docx

Martin

Gail and I have reviewed/edited these Uinta Basin ozone talking points.

I think this format is fine to give to Jody for the WGA meeting as it focuses on just ozone in the Basin. The Hot Issue paper will be more focused the draft FIP.

Take a look at the last point as it does touch on EPA's draft rulemaking.

Subject: Talking points for WGA meeting

Hi Carl – Attached is what I got from Jody/Chris D with some quick edits from me. Jody said

Ex. 5 - Deliberative Process

If we want to proceed with this, maybe I should put this into the new e-briefing format and I can spend some more time on the content. Just didn't want to waste a bunch of time if we don't want to push this.

Thanks,

Gail
